Command Prompt

```
C:\Users\Admin\Desktop>help dir
Displays a list of files and subdirectories in a directory.

DIR [drive:][path][filename] [/A[[:attributes]]] [/B] [/C] [/D] [/L] [/N]
    [/O[[:sortorder]]] [/P] [/Q] [/R] [/S] [/T[[[:timefield]]]] [/W] [/X] [/4]

[drive:][path][filename]
    Specifies drive, directory, and/or files to list.

/A      Displays files with specified attributes.
attributes   D Directories          R  Read-only files
              H Hidden files        A  Files ready for archiving
              S System files        I  Not content indexed files
              L Reparse Points     - Prefix meaning not
/B      Uses bare format (no heading information or summary).
/C      Display the thousand separator in file sizes. This is the
        default. Use /-C to disable display of separator.
/D      Same as wide but files are list sorted by column.
/L      Uses lowercase.
/N      New long list format where filenames are on the far right.
/O      List by files in sorted order.
sortorder   N  By name (alphabetic)  S  By size (smallest first)
            E  By extension (alphabetic) D  By date/time (oldest first)
            G  Group directories first - Prefix to reverse order
/P      Pauses after each screenful of information.
/Q      Display the owner of the file.
/R      Display alternate data streams of the file.
/S      Displays files in specified directory and all subdirectories.
/T      Controls which time field displayed or used for sorting
timefield   C  Creation
            A  Last Access
            W  Last Written
/W      Uses wide list format.
/X      This displays the short names generated for non-8dot3 file
        names. The format is that of /N with the short name inserted
        before the long name. If no short name is present, blanks are
        displayed in its place.
/4      Displays four-digit years

Switches may be preset in the DIRCMD environment variable. Override
preset switches by prefixing any switch with - (hyphen)--for example, /-W.

```
C:\Users\Admin\Desktop>help dir
Displays a list of files and subdirectories in a directory.

DIR [drive:][path][filename] [/A[[:attributes]]] [/B] [/C] [/D] [/L] [/N]
    [/O[[:sortorder]]] [/P] [/Q] [/R] [/S] [/T[[[:timefield]]]] [/W] [/X] [/4]

[drive:][path][filename]
    Specifies drive, directory, and/or files to list.

/A      Displays files with specified attributes.
attributes   D Directories          R  Read-only files
              H Hidden files        A  Files ready for archiving
              S System files        I  Not content indexed files
              L Reparse Points     - Prefix meaning not
/B      Uses bare format (no heading information or summary).
/C      Display the thousand separator in file sizes. This is the
        default. Use /-C to disable display of separator.
/D      Same as wide but files are list sorted by column.
/L      Uses lowercase.
/N      New long list format where filenames are on the far right.
/O      List by files in sorted order.
sortorder   N  By name (alphabetic)  S  By size (smallest first)
            E  By extension (alphabetic) D  By date/time (oldest first)
            G  Group directories first - Prefix to reverse order
/P      Pauses after each screenful of information.
/Q      Display the owner of the file.
/R      Display alternate data streams of the file.
/S      Displays files in specified directory and all subdirectories.
/T      Controls which time field displayed or used for sorting
timefield   C  Creation
            A  Last Access
            W  Last Written
/W      Uses wide list format.
/X      This displays the short names generated for non-8dot3 file
        names. The format is that of /N with the short name inserted
        before the long name. If no short name is present, blanks are
        displayed in its place.
/4      Displays four-digit years

Switches may be preset in the DIRCMD environment variable. Override
preset switches by prefixing any switch with - (hyphen)--for example, /-W.
